

JSK3CNWL

Fifth Wheels

NEW Lightweight Technology

The JSK3CNWL is JOST's lightweight option for highway applications--without the expensive cost of aluminum. This model features a fusion welded steel top plate that incorporates a carbon fiber beam.

- Same proven locking mechanism
- Convertible to a standard lubricated fifth wheel
- Same surface area as JSK37UW low lube fifth wheels
- Replaceable steel wear ring
- Compatible with all JOST brackets

Disclaimer: all top plates come in standard black powdercoat

Low Lube Liners

Composite pads are bolted down to the top plate for quick and easy replacement when worn.

Steel Wear Ring

Built to last in tough conditions, keeping your JOST fifth wheel on the road longer.

Infinite Internal Adjustment

Shortened internal adjustment for weight and space savings.
