

L300 Series

JOST

Cost Effective & American Made

From its components to the final assembly, the L300 is made in the USA. The series is a cost effective landing gear developed specifically for the replacement market. The L300 landing gear continues to have the internal gear train and features of the standard JOST landing gear models.

- Internal gearbox protects gears and prevents shaft misalignment.
- Austempered ductile iron gears will not wear out.
- Double “D-Style” shaft allows crank force to go directly into the gearbox, not torquing the bolt.

CAPACITIES & RATINGS

Max. Static Load*	140,000 lb.
Lift Capacity**	50,000 lb.
Side Load (Per Set)*	26,000 lb.
